

Speech Therapy Orders:

- *Swallowing Evaluation*— order a **Speech Bedside Swallowing Eval/Tx Adult OR Pediatric**
- *Speech/Language/Cognitive Eval*—**Speech Eval/tx.**
- *Video-fluoroscopic Swallow Study*-Video use **Swallow Care Set**. This study requires coordinating the Speech & Radiology departments. It is important to use the Care Set so that both Speech and Radiology are notified of the study. **Do Not order the Speech Video Swallow Eval.**
- Screening/Consult: **Speech Therapy Referral** – This generates a chart review and discussion with nursing staff to determine if an evaluation is needed/warranted.
- **Do Not order Speech Additional Treatment.** Speech Therapists use this order to enter the number of times the patient will be seen. An alert will remind you this order should only be entered by Speech.
